

ANNUAL REPORT 2007

Consolidated financial statement of Echo Investment S.A. Capital Group

Kielce, April 30, 2008

Letter to Shareholders, Partners and Clients

Dear Sirs,

2007 turned out to be another outstanding year in the history of Echo Investment Capital Group. We have strengthened our market position. We have been able to significantly expand the range of our operations. Again, we earned record gains:

the net profit of the Capital Group was PLN 319 million, i.e. 14.7% higher than that earned during the preceding year.

The value of consolidated revenues was 14.8% higher than in 2006, having reached PLN 382 million.

The key factor influencing the profit earned was the revaluation of real estates belonging to the Capital Group, as well as the sales of commercial projects in Lodz and Kielce.

The good results were achieved as a consequence of changes implemented in the Group's organizational structure at the beginning of last year, confirming that the assumed development strategy was correct.

In 2007, Echo Investment focused on guaranteeing new development opportunities through buying attractive land properties, continuation of commenced investments and preparing new projects.

The Group invested in largest Polish cities while launching its activities on new markets as well: land was purchased for housing projects in Lodz and Wroclaw, office investments in Szczecin, Gdansk and Katowice, and shopping & entertainment centers in Kalisz and Koszalin. One of last year's key events was the commencement of investment process in another country of our region – Echo Investment obtained land for building a shopping and entertainment center in Brasov, Romania.

The most important investment-related event was the opening of the Pasaż Grunwaldzki shopping and entertainment center in Wroclaw, which is the largest of all the Group's projects. An Office Park was also opened in Kielce as a new seat for Capital Group companies. Works were also commenced in 2007 on development of two large office projects, namely the Malta Office Park in Poznan and Park Postępu in Warsaw. Two housing projects were further launched in Poznan.

A number of new projects were prepared, to commence in 2008:

- in the malls sector: extension of Galeria Echo in Kielce
- in the office sector: business parks in Gdansk, Szczecin, Lodz and Krakow
- in the housing sector: Klimt House luxury apartment building in Warsaw, and an estate of detached houses in Bilcza near Kielce.

The year 2007 brought a breakthrough in terms of reinforcing the Group's organizational structure necessary for implementing the tasks determined in the adopted development strategy. An intensive training program for managers has been introduced, based on top project management standards of the Project Management Institute. Training courses were also held for the purpose of perfecting specialist staff's and ordinary workers' skills. Proper technological solutions were introduced, along with implementation of IT tools for supporting work of the entire organization, and project management support tools.

According to the Group's development strategy, the basic goal is to ensure guaranteed long-term growth of goodwill.

The following means will be used in achieving this goal: execution of development projects for sale (apartments and hotel), regular expansion of the investment project portfolio (offices and shopping centers for rent).

The Group's main task in 2008 and during the next years will be persistent implementation of the adopted strategy, where the assumptions for 2008 to 2013 include completion of 43 new investments, significant increase of expenditures and land bank for consecutive projects. Total rentable area and area for sale in the scheduled investments exceeds 1 million square meters.

As it was the case in the preceding years, all the Group's activities are focused on our global but still very simple goal – namely, achievement of best results possible to guarantee steady growth of asset value and yield rate of Echo Investment Capital Group, which is what our Shareholders and Partners expect from us.

On behalf of the Management Board, I would like to express my gratitude to all those who have contributed to the achievement of such outstanding results by Echo Investment Capital Group in 2007. I truly believe this success will make us stronger on our way to continued development and will motivate us to take more challenges in the future.

Yours sincerely,

Jarosław Grodzki

7. Items disclosed in the report are determined in accordance with the following principles:

1. Intangible assets

Intangible assets are recognized if there is a probability of yielding economic advantages in the future that may be directly related to such assets. Initially, intangible assets are disclosed according to acquisition prices or production costs. After initial posting, intangible assets are valued according to acquisition prices or production cost, less depreciation and write-offs due to permanent loss in value.

Records of intangible assets are kept according to analytic methods. Tax rates are applied in the depreciation scheme. The most significant item of intangible assets is computer software.

2. Goodwill of subsidiaries

Goodwill resulting from acquisition of shares or stocks in subsidiaries is initially disclosed according to acquisition price, being a surplus of acquisition costs of these units over the Group’s share in net fair value of identifiable assets, liabilities and contingent liabilities. After initial disclosure, goodwill is presented according to acquisition price less all accumulated write-offs due to permanent loss in value. Goodwill is reviewed for possible loss of value at least once a year, or more frequently in case of occurrence of any events or changes indicating possible loss of value. Goodwill is not amortized.

3. Tangible assets

Fixed assets are interpreted as immovable property owned by the company (not leased and not intended for trade), machines and items of equipment, means of transport and other complete and usable items with an estimated life longer than one year. The following are particularly classified as fixed assets: furniture, fixed and mobile telephones, items of electronic equipment, regardless of their prices.

Fixed assets are valued and disclosed in the statements according to acquisition prices or production costs, less depreciation and write-downs due to permanent loss in value. The costs pertaining to a fixed asset, which were borne after putting such asset in operation, refer to the profit and loss account, except for a situation where it is possible to prove that such costs resulted in an increase in expected future economic advantages on account of possessing the given fixed asset. In such case, the yielded costs add up to the initial value of the fixed asset.

Fixed assets are booked on summary accounts according to Fixed Assets Classification groups. Detailed records of fixed assets are also kept. Fixed assets are depreciated according to declining balance method and equally through tax rates. Fixed assets with acquisition prices lower than PLN 3.5 thousand are depreciated once in their full value under the date of purchase. For fixed assets that have permanently lost their economic usability, extraordinary depreciation write-offs are made in other operating costs. Fixed assets include, among other items, the right to perpetual usufruct of land, which is depreciated equally during the period of usufruct. Ownership rights of land are not depreciated.

The company has verified the value of available fixed assets. The values of fixed assets disclosed in the statement do not differ from their assumed costs.

4. Fixed assets under construction

This item includes costs that are directly related to an investment not yet completed. These include expenses incurred on acquisition of land property, expenditure on execution of buildings (mainly foreign services) and activated and direct financial costs. After obtaining an occupancy permit, the completed real estates are reclassified as fixed assets or investments in real property, depending on their designed use. Fixed assets under construction are valued according to acquisition prices or production costs.

5. Investment immovable property

Investment immovable property includes leased real estates with land directly related to such real estates, owned by the company. Investment properties are initially disclosed according to acquisition prices / production costs.

After initial posting as on the first balance day, investment properties are presented according to their fair value. Fair value is revaluated at least once every three months. Profits or losses resulting from change in fair value of investment real property is disclosed in the profit and loss account in the period of their occurrence.

Fair value is determined by the company individually, with the investment method, using simple capitalization method as a result of net operating income (NOI) of the project and yield rate. Yield rate is verified by independent property experts at least once a year.

Residential and garage properties with values below PLN 1,000 thousand, due to minor difference between such valuation and valuation according to fair value, are appraised according to production costs method corrected by depreciation and write-offs due to permanent loss in value.

Differences on investment properties are accounted for in the profit and loss account under the item of real estate revaluation.

6. Shares and stocks

Shares and stocks in other companies are valued according to acquisition prices, less write-downs due to permanent loss in value.

Differences on valuation of shares are applied to the profit and loss account under the item of financial revenues / costs.

7. Inventories

The following are disclosed under inventories: semi-finished products and work in process, finished products, goods, and advances on deliveries. Due to unique quality of operations, purchased land or right of perpetual usufruct of land is classified as work in process if the land is designed for development, or as goods if the land is designed for sale. Finished products mainly include housing and service premises sold through final contracts.

Inventories of non-current assets are valued according to equivalents of acquisition price of land property and costs of production of development activity products increased by activated financial costs. Inventories related to long-term construction contracts are valued according to the guidelines of IAS No. 11 'Construction Contracts'. Inventories are valued not higher than obtainable net value at sale. Advances on deliveries are valued according to cash expenditure and according to received VAT invoices documenting granting an advance.

8. Accounts receivable

Receivables are disclosed in the balance sheet as amounts due and payable, with due caution. The value of receivables is updated accounting for probability of their payment through a revaluation write-down. Revaluation write-downs on receivables are posted at the end of each consecutive 6-month period and each consecutive year according to the following criteria:

- for receivables aged over one year – for full value of the account,
- for receivables aged over six months but not longer than one year – 50% of the value of the account.

In certain justified cases, individual principles of calculating revaluation write-downs may apply.

Receivables include interest on deposits, charged but not matured, valued as amounts due and payable.

9. Short-term investments

Short-term investments, except for financial instruments, are valued according to acquisition price or market value, whichever is lower. Short-term investments for which an active market does not exist are valued according to acquisition prices, accounting for write-downs due to permanent loss of value. The results of increases or decreases in the value of short-term investments valued according to market prices (values) are classified as financial revenues or costs, respectively.

10. Cash

Cash on bank accounts and in hand, short-term investments maintained up to due dates and other financial assets (interest on loans granted if falling due within 3 months from the statement date) are valued in nominal values.

Cash in foreign currencies is valued at least on each reporting date according to the buy rate of the bank employed by the Company. Foreign exchange gains / losses pertaining to cash in foreign currencies and operations of sale of foreign currencies are classified as financial costs or revenues, respectively. The same definition of cash applies to the cash flow statement.

11. Loans granted

Loans granted are disclosed according to depreciated acquisition price, determined using effective interest rate method.

12. Deferred income tax

The following items are created on account of deferred tax: deferred income tax assets, and provision for income tax. These items are valued according to their reasonable estimated value. The provision is calculated with the tax rate to apply during the next reporting period. Assets on account of deferred income tax on account of tax loss are established if settlement of such loss in the following years is certain of occurring.

13. Equity capitals

Share capital and reserve capital is valued in its nominal value. The differences between fair value of received payment and nominal value of shares are disclosed in supplementary capital from sale of

shares above their nominal value. The costs of shares issue, which are borne at the point of establishment of a joint stock company or increase in initial capital reduce the company's reserve capital to the amount of surplus of issue value over nominal value of shares, while their remaining part is classified under financial costs.

14. Reserves

Reserves are established if the Company is under an existing obligation resulting from past events, it is probable that fulfillment of this obligation will occasion necessary expensing of funds existing as economic benefits, and the amount of such obligation can be fairly and credibly estimated. Reserves are specifically established for costs of investment projects in progress, costs of bonuses, cash equivalents for holidays not used by employees and audit costs, which have not been borne yet but which fall on the current period. Reserves for costs of bonuses are established pursuant to resolutions of the management board. Other reserves are established on the basis of resolutions of the management board or decisions of the chief accountant / deputy chief accountant.

According to the adopted principle, reserves for leave payments are not established. Such potential reserves would have no significant impact on the presented financial statement. At the point of occurrence they would be booked on a cash basis.

15. Accounts payable

Accounts payable are disclosed in the balance sheet as amounts due and payable.

Financial obligations include in particular loans, credit facilities, debenture bonds, not matured interest on bank credit facilities which are booked according to the accruals method, as well as discount on short-term and long-term debenture bonds to be settled in the following accounting period, with a minus mark. Foreign currency credits are valued according to the sell rate of the bank employed by the Company.

Long-term financial obligations (debts) are valued with the 'depreciated cost of liabilities component' method, according to IAS 39. The risk and probability of early repayment of long-term debts is taken into consideration during appraisal.

The item of advances for deliveries covers both invoiced advances (including advances on apartments) and ones that have not been invoiced.

The amount of the company social benefits fund is established on the basis of the Act on Company Social Benefits Fund (Journal of Laws of 1994, no. 43, item 163, as amended) and disclosed in the balance sheet in its nominal value, in the about brought forward.

16. Methods of determining the financial result (profit/loss)

The bottom line is determined on the basis of the profit and loss account, applying the accruals concept, matching principle, yield and precautionary principle, upon reducing gross profit by input income tax, write-offs on account of provision for transitional difference on account of income tax and other charges on the bottom line. The bottom line (profit/loss) is determined using the multiple-step method.

- a) The costs of production of products sold include yielded costs pertaining to the revenues of a given accounting year and costs not yet borne, booked according to the principle of matching revenues and costs.
- b) The cost of sold services and products is valued on the basis of production costs, using one of the following two methods, depending on the types of projects:
 - profitability level according to the sales contract, or average (calculated) profitability level assumed by the company;
 - percentage share of such items as: sold area of land, sold shares, etc. (according to average prices) In particular, own cost of sold premises and land is settled in proportion to sold shares in land.

In certain justified cases it is acceptable to use the method of precise identification of actual costs of sold assets.

- c) The following items are also classified as costs and revenues:

- in the range of other sales of products and services – revenues invoiced and due to the company, with corresponding costs,
- yielded costs of sales and overheads; costs not yet borne, booked according to the principle of matching revenues and costs,
- gains and losses from sales of securities and valuation of the company's assets and liabilities (including differences in receivables revaluation write-downs),
- all financial revenues receivable by the company,
- yielded and booked financial costs pertaining to the current period, except for costs activated according to an alternative solution presented in IAS 23 'Borrowing Costs'. The Company activates the part of financial costs which are directly related to acquisition and production of assets disclosed as inventories and commenced investments. The following amount of costs is activated: interest, discount and commissions, less revenues earned on temporary deposition of cash (i.e. amounts of interest on bank deposits, except for deposits resulting from holds of accounts, L/C contracts).
- realized extraordinary gains and yielded extraordinary losses, including only those items that did not occur in the course of normal economic activity.

17. Cash Flow Statement

Cash flow statement is prepared according to indirect method. Arranged overdraft obligations are presented as debt on account of credits and not as a cash equivalent.

- operations in Hungary,
- operations in Romania.

The supplementary classification is the division into field segments.

Three field segments have been distinguished in the Capital Group:

- letting and sales of commercial space,

Field segments have been described as distinguishable fields of an economic entity, where goods are distributed, services are provided, or a group of related goods or services is delivered, subject to risk and described by a rate of return from investment expenditure different from ones typical of other field segments.

Accounting rules

The accounting principles of a segment are the principles applied to preparation and presentation of the Group's consolidated financial statement, as well as the accounting principles applicable directly to segments-related reporting.

Revenues from a segment

Revenues from a segment mean the income earned on sales to third party clients or from transactions with other segments within the Group, which are disclosed in the Group's profit and loss account and can be directly allocated to the given segment, along with the respective part of the Group's revenues, which can be allocated to this segment on reasonable bases. The following are not classified as segment revenues:

- a) extraordinary profits,
- b) revenues from interest or dividends, including interest earned on advances paid or loans granted to other segments, unless the operations of the given segment are primarily focused on financial issues,
- c) profits from sales of investments or profits resulting from debt expiry, unless the operations of the segment are mainly focused on financial issues.

Income from the segment includes the Capital Group's shares in profits or losses of associated companies, joint ventures or other consolidated financial investments, using the ownership rights method, provided that the above items are contained in consolidated or general income of an economic entity.

Costs of segment

Costs of segment mean the costs composed of costs of sales to outside clients or costs of transactions realized with other segments within the Group, which result from the given segment's operating activity and can be directly allocated to the given segment, along with the respective part of the Group, which can be allocated to this segment on the basis of reasonable premises. Such costs can be classified as costs of segment if they apply to the segment's operating activity and can be directly allocated or assigned to the segment on reasonable bases.

Result of segment

The result of segment is the difference between the income from segment and costs of segment. The result of segment is determined before adjustments for minority shares.

Assets of segment

Assets of segment are current assets used by the segment in its operating activity that can be directly allocated to the given segment or assigned to that segment on the basis of reasonable premises.

If the result of segment comprises income from interest or dividends, the segment's assets shall comprise relevant receivables, loans, investments or other assets resulting in occurrence of revenues.

Liabilities of segment

Liabilities of segment are current liabilities occurring as a result of the segment's operating activity that can be directly allocated to the given segment or assigned to that segment on the basis of reasonable premises.

3. Description of major risk factors and threats, specifying the extent to which the issuer's Capital Group is exposed to them

The following should be classified among major risk factors and threats for the operations of Echo Investment S.A. and the Capital Group:

- competition risk – the real estate market in Poland has become very attractive for foreign investors in the recent years due to achievable rates of return. The advantages of foreign companies include their capital resources, which constitute competitive advantage over domestic developer companies. The advantage of Echo Investment S.A. is its extensive experience in execution of developer projects in various market segments and its recognized position in the real estate market in Poland. Dynamic growth of the Capital Group in the recent years and its portfolio of assets indicate that Echo Investment S.A. is capable of efficient functioning in the conditions of market competition.
- risk of operations on foreign markets – related to the economic and political situation in the country where the Company intends to launch its operations. The Company's policy relies on diversification of geographic locations (Central and Eastern Europe) and sector-based diversification of its portfolio.
- risk of adverse changes on the real estate market – relating to adverse variation of market factors influencing Echo Capital Group's activities on the property market. Echo Investment SA and the subsidiaries try to minimize the risk of adverse changes on the real estate market through executing investment projects in stages and adapting investment realization rate to expectations, trends, demand and prices on local markets.
- interest rate risk – the operations of Echo Investment S.A. and its subsidiaries are based on external financing (during the execution phase of a building) and refinancing (during the period of project exploitation). The risk related to changes in interest rates is limited through diversification of interest on loans taken and securing instruments. Echo Investment S.A. as the dominant company focuses the operations in the financial market, whose range covers the finance of the entire capital group.
- lost liquidity risk – this relates to potential loss of financial liquidity. Echo Capital Group eliminates this risk through maintaining proper balance between financing of its investment activities and timely handling of debts and maintaining a sufficient level of working capital.
- foreign exchange risk – this refers to loans taken in foreign currencies (most commonly in Euro) within the Capital Group. Contracts with tenants are expressed in the currency of the credit facility taken out for refinancing. Thus obtained payments from tenants are allocated to repayment of the above mentioned loans. Such combination of financing with sources of income minimizes or eliminates foreign exchange risk.
- risk of tenants' financial condition – most of the revenues are earned within the range of operations performed by the capital group from lease of commercial and office areas. The key aspect is selection of tenants with stable economic and financial condition. In shopping centers, tenants include chain operators (Tesco, Carrefour, Ahold, Nomi, brand clothing shops, multiplex cinemas, etc.). Cooperation with tenants enables undertaking such activities that would continuously improve the attractiveness of leased areas and emphasize the prestige of a given building, thus attracting new clients. The following companies can be mentioned among clients in office buildings: Philips, Nordea, Polkomtel S.A., BRE Bank S.A., Deutsche Leasing and others.
- risk related to external contractors – when acting as an investor in a given project, Echo Investment S.A. or its subsidiary contracts its execution to external companies. Execution of these

facilities, timely completion, quality and possible increase in costs largely depend on these companies. This factor is eliminated to a significant extent through various types of protective measures included in contracting agreements.

- fiscal and legal risk related to the unstable taxation and legal system, lack of certain ownership-related regulations. Accession to European structures and adoption of procedures applied by the EU should significantly foster reduction or elimination of this risk in the forthcoming years.
- risk of administrative procedures – as Echo Investment S.A. is involved in the process of executing individual projects from the beginning, its operations depend on administrative procedures. Time-consuming procedures of administrative authorities determine commencement of implementation of the Company's planned investments, which may result in delays in their completion.

Segment of shopping centers and shopping/entertainment centers

Shopping and shopping/entertainment centers built by the Group operate in more than ten cities in Poland. The stability of the market of shopping areas is due to high market demand, possibility of adapting to the requirements of specific clients and high diversification of industries.

Domestic and international shopping chains, as well as local companies are tenants of commercial areas in these buildings. Key tenants in shopping centers include: Carrefour, Tesco, Real, Hypernova, E'Leclerc, Nomi, ITI Neovision, RTV Euro AGD, Empik, Douglas, Saturn Planet, Supermarkety Drogerijne Rossman and other chain brands.

In April 2007, an advanced shopping, entertainment and service center called Pasaż Grunwaldzki [Grunwaldzki Arcade], located in Wrocław at Grunwaldzki Square, was opened. Rentable area of about 48,700 sq. m has been let to tenants in 100%.

In July 2007, final agreements of sale of Echo Capital Group's real estates were signed. The object of the contracts is the perpetual usufruct of immovable property situated in Łódź at Al. The parties to the transaction further signed a developer agreement whereunder Echo Capital Group was allowed to expand the Pasaż Świętokrzyski mall.

A modern shopping and entertainment center called METROPOLIS will be built on the Company's immovable property situated in Poznań, Hetmańska Street, offering about 80,000 sq. m of space for rent. The Center will be designed by Studio ADS, architects' office of Poznań. The anticipated

commencement date of investment falls in the 1st half of 2009 and completion date in the 2nd half of 2011.

Development of the largest shopping and entertainment center in Słupsk, called ARENA, is planned on the Company's property of 64,000 sq. m, to be situated in an attractive location of Słupsk at Grottgera Street. The facility shall offer about 75,000 sq. m total area and 38,000 sq. m rentable area.

A preliminary lease agreement was signed with Tesco (Polska) Sp. z o.o. The preliminary lease agreement concerns lease of ca. 8,900 square meters of commercial surface in the Arena shopping and entertainment center that is being prepared for development in Słupsk at Grottgera Street (the Mall). The Tenant is going to engage in trade and service activity in the Mall in the form of a grocery and household goods store in unlimited range of standard commodities typically sold in such Tesco outlets in Poland. The contract of lease that the parties agreed to sign foresees a term of 30 years. The estimated value of contract for 30 years of lease is a Polish zloty equivalent of EUR 17.69 million, i.e. PLN 65.31 as on the contract effective date according to the average rate of exchange published by the National Bank of Poland. A precondition for signing the aforementioned lease contract is obtaining a final building permit decision for the Mall by the Subsidiary or another organization contracted thereby and taking possession of the real estates dedicated to the development of the Mall not later than on July 31, 2008. The aforementioned condition is a condition precedent.

Lease agreements were made with such companies as Helios, Media Markt, BC Club, Rossmann, Ravel. The anticipated project commencement date will be the 1st half of 2008, and completion date will fall in the 2nd half of 2010.

Echo Capital Group intends to develop a modern regional shopping and entertainment center on the immovable property purchased in the 3rd quarter of 2007, located in Kalisz. The facility will be built at Górnioślaska Street and Trasa Bursztynowa (the Amber Route). The contract value was PLN 18.8 million. The total area of the contemplated center shall be ca. 100,000 square meters, with rentable area of about 40,000 square meters. The launching of the project is scheduled for 2009 and completion in 2011.

On January 10, 2008 through acquisition of shares in Ultra Marina Sp. z o.o., Echo Investment SA acquired the title to immovable property exceeding 3 hectares in size, located at Krakusa i Wandy Street in Koszalin. The value of shares acquisition contract was PLN 11.77 million. The Company intends to develop a modern shopping and entertainment center on this land. Area to let in the building will be about 35 thousand square meters. The anticipated commencement date of investment falls in the 1st half of 2010 and completion date in the 1st half of 2012.

In the 4th quarter of 2007, Echo Investment SA entered into an agreement with the City of Lublin regarding development of PARK ECHO on Górki Czechowskie, Lublin. The city is going to initiate amendment of the spatial development plan, thus enabling commencement of development activities on the scheduled investment. The Company shall at its own expense reconstruct the traffic system in the neighborhood of the contemplated shopping and entertainment center Park Echo and the existing crossing of al. Solidarności with al. Sikorskiego and ul. Gen. Bolesława Ducha. The estimated value of this investment project shall be about 80 million zlotys. According to the provisions of the aforementioned agreement, the City agreed to take whatever action is required to amend the local spatial development plan of the City of Lublin, within 36 months from the effective date of agreement, for the Company's real estate with the approximate area of 113 hectares, located in Lublin at Poligonowa Street, in the area of so-called Górki Czechowskie, in order to enable Echo Investment SA to execute its contemplated investments. The Company intends to build the following establishments on the aforementioned property: - a shopping, entertainment and service center (the Mall) with a total shopping area reaching 80,000 square meters, developed in combination with reconstruction of the traffic system around the contemplated building as a necessary Mall service component,

- a complex of service and office establishments complementing the functions offered by the Mall,
- a city-style recreation and landscape park. When the aforementioned changes are made to the spatial development plan, Echo Investment SA shall: - prepare a concept and complete technical documentation with a building permit for reconstruction of the traffic system in the vicinity of the

contemplated Mall and the existing crossing of Al. Solidarności with Al. Sikorskiego and ul. Gen. Bolesława Ducha,

- reconstruct the traffic system at the Company's sole expense,
- deliver the reconstructed traffic system before opening the Mall and complete the development of the park comprised by the contemplated investment not later than within 36 months from entry into force of a Resolution of the Lublin City Council, approving the amendments to the local spatial development plan,
- transfer the entire road system gratuitously to the City following completion of the investment consisting in reconstruction of the traffic system. If a building permit for the Mall cannot be obtained within 24 months from the date of entry into force of the aforementioned Resolution of the Lublin City Council approving of the amendments to the local spatial development plan, Echo Investment SA shall be entitled to terminate the agreement. The estimated cost of reconstruction of the traffic system will be about 80 million PLN. Specific terms and conditions of reconstruction of the traffic system shall be stipulated in a separate agreement (Road Agreement). Should the parties to the agreement fail to enter into a Road Agreement within 9 months from the effective date of the present agreement, either party may terminate the agreement.

Erection of shopping centers in Łomża supplements the portfolio of commercial areas with simultaneous improvement of quality and advancement of the Company's offering. In the shopping center in Łomża, which is currently being prepared to execution, the REAL superstore will be opened, with an approximate area of 8,500 square meters. The parties to the contract, i.e. Echo Investment SA and real,- Sp. z o.o. and Spółka sp.k., are entitled to terminate the contract if Echo Investment SA's subsidiary does not, until June 22, 2008, acquire the immovable property situated in Łomża and if it fails to obtain a final building permit until June 30, 2009. The Company is expecting completion of administrative procedures.

During the 4th quarter of 2007, the Łomża City Council agreed to an amendment of the spatial development conditions and directions study in order to allow development of a shopping center exceeding 2,000 square meters in size.

Echo Investment Group also intends to expand some of its existing shopping and shopping/entertainment centers. 10. In case of issue of securities during the reporting period – description of the use of revenues from the issue by Echo Investment S.A.

The dominant company - Echo Investment S.A. did not issue any securities (shares) in 2007.

11. Clarification of differences between financial results disclosed in the annual statement and previously published prognoses for the year 2007

Neither Echo Investment S.A. Capital Group nor the dominant company – Echo Investment S.A. published any prognoses of financial results for the year 2007.

12. Evaluation of management of financial resources of Echo Investment S.A. Capital Group, with special consideration of the capacity of paying off the incurred debts

Management of financial resources of Echo Investment S.A. Capital Group in 2007, in relation to the investment process in progress of erection of commercial facilities and apartments was mainly focused on obtaining sources of financing for realized projects, bridge financing (until the point of obtaining financing by subsidiaries) and maintaining safe liquidity ratios and assumed financing structure.

The capital group's operations during 2007 yielded a positive result on all levels of the profit and loss account. During the recent years, Echo Investment Capital Group has been increasingly emphasizing the increase of portfolio of commercial surfaces, which according to the Management Board of the Company should ensure stable revenues and cash flows. According to the Management Board, Echo Investment Capital Group's property and financial condition at the end of 2007 indicates the Group's stable financial standing.

Rates of return corresponding to the business activity carried out within the Capital Group in 2007 are lower than those of the preceding year. The ROA recorded most significant depreciation. Rates of return on assets and return on equity have deteriorated slightly, which is a consequence of more rapid growth of the value of assets and equity than of net profit.

Profitability indicators during the years 2007-2006 are presented in the table below:

| Yield ratios | 2007 | 2006 |
|--|-------------|-------------|
| Operating profit margin ratio <i>operating profit / net revenues from sales</i> | 104,4% | 114,3% |
| Net balance profit margin ratio <i>net profit / net revenues from sales</i> | 83,4% | 83,5% |
| Rate of return on assets (ROA) <i>net profit / assets total</i> | 9,0% | 10,2% |
| Rate of return on equity (ROE) <i>net profit / equity capital</i> | 21,1% | 23,3% |

The rotation of key items of assets and liabilities in Echo Investment Capital Group is due to the unique qualities of performed operations. It is related to the relatively long cycle of execution of the specific investment projects and the value and volume increase of the 'portfolio' of executed investments. This directly fosters an increase in the value of inventories, covering the following items in the Capital Group: acquired ownership rights and rights of perpetual usufruct of land and all building expenses and costs pertaining to executed developer projects designed for sale. Inventories and short-term liabilities rotation cycle became longer and the cycle of short-term receivables became shorter.

Movements of key assets and liabilities during the years 2007-2006 are presented in the table below:

| Activity indicators | 2007 | 2006 |
|--|------|------|
| Inventories cycle in days (average balance of inventories * 365 / net sales revenues) | 435 | 228 |
| Short-term receivables cycle in days (balance of short-term receivables * 365 / net sales revenues) | 57 | 85 |
| Short-term trade debt cycle in days (balance of short-term trade debts * 365 / net sales revenues) | 116 | 97 |

Liquidity ratios are maintained on safe levels. All the liquidity ratios presented below are higher than in 2006. This is primarily due to the Management Board's policy related to financing of investment projects in progress. Echo Investment Capital Group's reliability in the financial market keeps increasing, which is confirmed by the diversified structure of banks financing the operations of the entire Group. The cash balance, which increased in comparison with the year 2007, also fostered improvement of relevant ratios.

Liquidity ratios of Echo Investment S.A. Capital Group during the years 2007-2006 are presented in the table below:

| Liquidity ratios | 2007 | 2006 |
|--|------|------|
| Current ratio current assets / short-term debts | 2,53 | 1,54 |
| Quick ratio (current assets – inventories) / short-term debts | 1,31 | 0,99 |
| Cash ratio cash / short-term debts | 1,06 | 0,79 |

Due to appropriate financing structure, the values of presented ratios are safe for performed operations and confirm Echo Investment S.A. Capital Group's credibility in the financial market. Compared to the previous year, the level of debt on assets remained unchanged but debt to equity rate increased slightly

Assets coverage and debt ratios of Echo Investment S.A. Capital Group during the years 2007-2006 are presented in the table below:

| Debt indicators | 2007 | 2006 |
|---|--------|--------|
| Equity to assets ratio equity / assets total | 42,7% | 43,6% |
| Equity to fixed assets ratio equity / fixed assets | 58,3% | 55,5% |
| Overall debt ratio debt total / assets total | 47,7% | 48,3% |
| Debt to equity ratio debts total / equity | 111,8% | 110,7% |

13. Evaluation of the possibility of realization of investment plans, including capital investments, as compared to the volume of available resources, accounting for possible changes in the structure of financing of these operations

Under the Capital Group, Echo Investment S.A. and its subsidiaries are fully capable of financing the currently executed investment projects. While executing projects in all areas of activity, Echo Investment S.A. Capital Group intends to finance these projects using funds from equity capitals, bank loans, issue of debt securities. The dominant company focuses its efforts on achieving a situation when programs of issue of debt securities are guaranteed and their aging period is longer than one year.

At the same time, the Capital Group intends to execute a number of projects through subsidiaries. This refers in particular to projects designed for lease, i.e. shopping and commercial / entertainment centers and offices, obtaining financing (special purpose facilities) directly for these companies.

14. Assessment of extraordinary factors and events affecting the financial results yielded in 2007

Another significant factor affecting the financial result was the clearing of the transaction of sale of two office projects and one shopping & entertainment center in Łódź, and of a Kielce mall. The contracts of sale of immovable property were executed on July 04, 2007. Total net price of transaction was USD 25,600,173 and EUR 47,373,902, i.e. an equivalent of PLN 248.7 million according to the exchange rate of the National Bank of Poland as on the transaction date. The book value of the assets in the books was PLN 222.6 million (balance as on June 30, 2007). Total area for sale in the sold projects is about 37.8 thousand square meters. Other important transactions were the sales of MDP shopping center and two office establishments in Łódź, and of the Pasaż Świętokrzyski mall in Kielce. The bottom line was also affected by the signing of final contracts of sale of the housing project of Warsaw, Inflancka Street, and clearing of the fee payable to Echo Investment S.A. under General Contracting Agreement signed with Ustra Sp. z o.o. with its registered seat in Kielce concerning erection of a complex of office buildings in Kielce, al. Solidarności Street.

Other factors include regular incomes from lease contracts, progress of execution, lease and sale of currently built commercial and housing investments, purchase of real estate, and quality improvement and value increase of the available investment portfolio. Other important aspects shall include the situation in the financial market and general economic trends in Poland, Hungary and Romania, where Echo Capital Group is going to commence its operations.
